Operations Head

Description

As an Operations Head, you will oversee all factory operations, integrating production management, quality control, and operational strategy. Your role is pivotal in ensuring efficient processes, top-tier output, and a secure work environment. Leading a diverse team, you'll spearhead initiatives for continuous improvement, optimizing manufacturing performance to meet business objectives.

This consolidated role combines the responsibilities and requirements of the previous Director of Production, Director of QC, and Operational Director positions into a cohesive and comprehensive leadership role within manufacturing operations.

Job Location

Hyderabad, Telangana

Responsibilities

- Oversee all operational aspects of the company, leveraging their extensive experience in automotive manufacturing to drive efficiency, quality, and innovation throughout the organization
- Lead and manage comprehensive factory operations, encompassing production planning, manufacturing processes, quality control, and maintenance
- Develop and execute operational strategies to maximize productivity, minimize costs, and achieve production targets
- Ensure strict adherence to health, safety, and environmental regulations, fostering a culture of safety throughout the organization
- Foster a high-performance team, offering coaching, training, and performance assessments to drive employee engagement and growth
- Collaborate cross-functionally with engineering, supply chain, and quality assurance teams to drive process enhancements and product innovation
- Implement and uphold efficient inventory management systems, optimizing material usage and reducing waste
- Monitor key performance indicators (KPIs) and production metrics to assess performance and pinpoint areas for enhancement
- Cultivate strong relationships with suppliers, contractors, and external partners to ensure seamless operations and supply chain continuity
- Stay abreast of industry trends, technological advancements, and manufacturing best practices.

Qualifications

- Incorporating experience in automobile manufacturing
- Bachelor's degree in Engineering, Manufacturing, Operations Management, or related field; Master's degree preferred
- Minimum of 10 years progressive experience in manufacturing operations, including 5 years in leadership
- Preferably experienced in the Automobile Centralized Lubrication systems
- Strong technical proficiency in manufacturing processes, equipment, and
